

# QR CODE Installation

QR코드

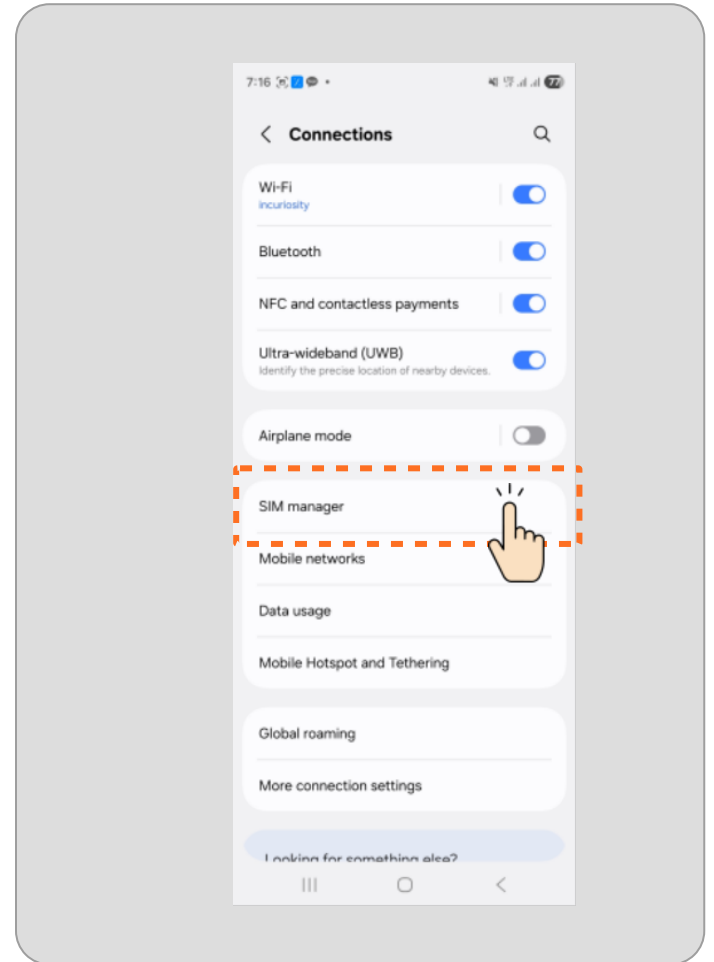

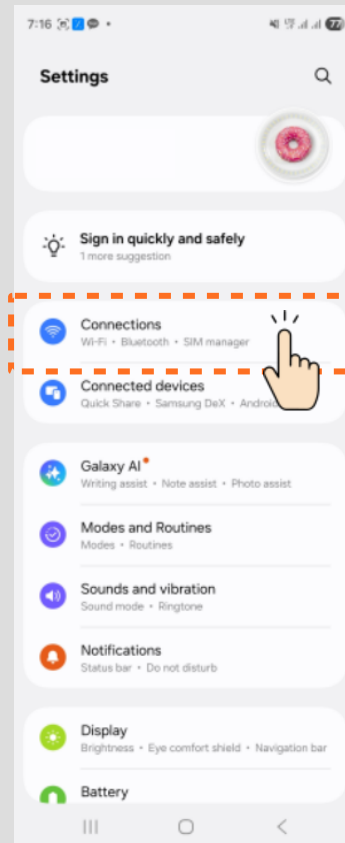

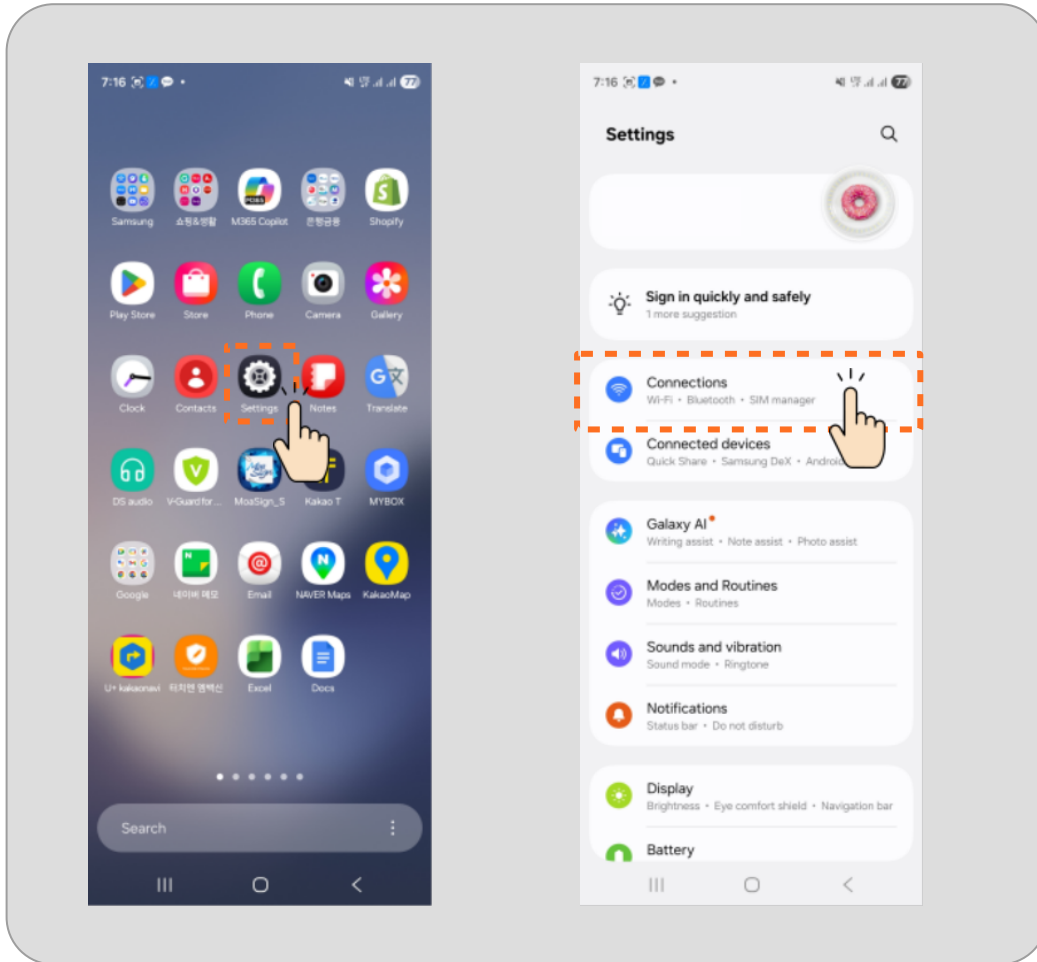

모바일에서 QR코드를 설치해 주세요.

# 1. Settings > Connections

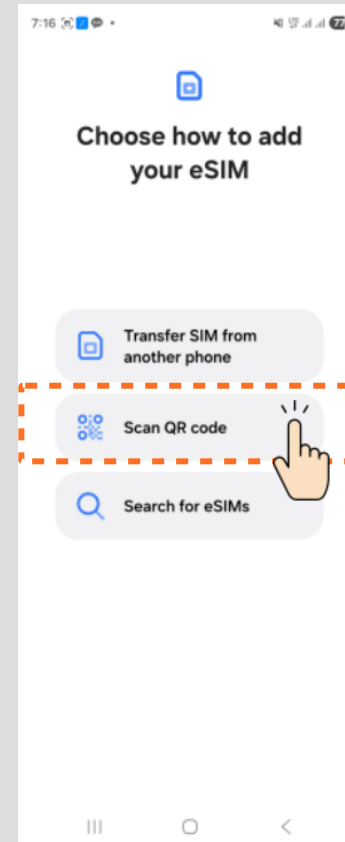

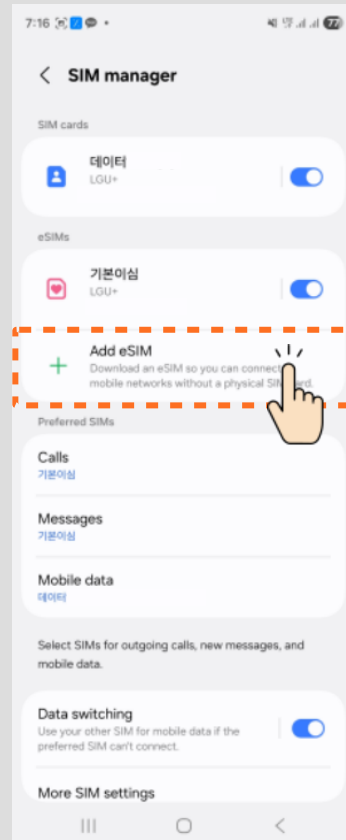

ANDROID

Please navigate to the [settings > connections > SIM manager] screen on your phone to install the eSIM.

## 2. ADD eSIM

After clicking 'Add eSIM', After the next screen press 'Scan QR code' on the screen.

# 3. Scan QR Code

Scanning the QR code provided to you will register your eSIM card.

If you cannot scan it,  
Option 1.  
you can manually enter  
the **[activation code]**  
provided with the QR code.

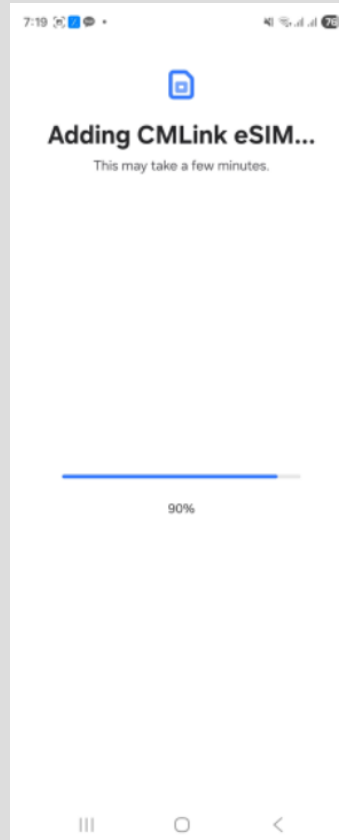

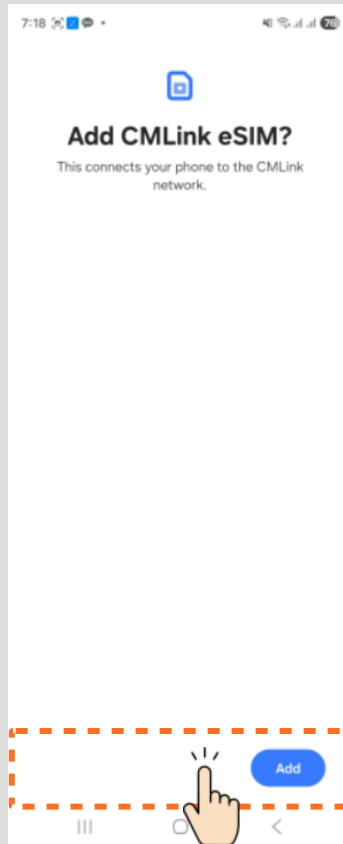

Option 2.  
[Gallery > Select saved QR Code > Done] Scanning  
a QR code from your gallery will proceed  
automatically.

# 4. eSIM Ready to Install

eSIM installation is ready.

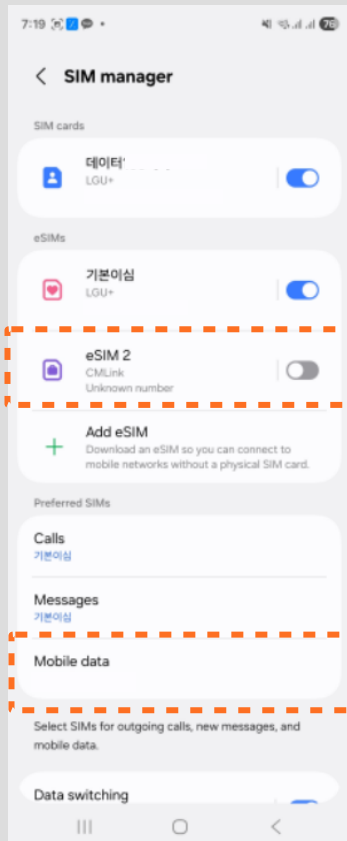

Click the 'Add' button and wait for the installation to complete.

- Installation may take some time.
- Network name may vary depending on the local operator's circumstances.

# 5. Check eSIM Installation

eSIM installation is complete.

Once installed, follow these steps to avoid unexpected charges:

Toggle the switch to activate your eSIM.

Go to the 'Preferred SIM' menu and select the eSIM for Data.

Turn off your home country's SIM (Recommended).

Important: If you keep your home SIM on, you must disable 'Data Switching.' Otherwise, your phone will automatically use your home network's data if the eSIM signal is weak, resulting in a huge phone bill."
